Office Action Summary

Art Unit: 1623

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,239,113 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed methods are encompassed by the patented methods.

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the treatment of eye infections, does not reasonably provide enablement for prevention of eye infections. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The terminology "prevent" (claim 1) reads on treating a healthy eye i.e. for delivering a vaccine to an eye for which there is no support in the specification.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1623

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-7 and 21-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson (First Meeting of the WHO alliance for the Global elimination of Trachoma, Geneva, 30 June - July 1997).

Dawson discloses the claimed method of topically treating an eye infection with an azalide antibiotic.

Claims 30-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over the International Patent No. WO 95/09601 or Curatolo et al (U.S. Patent No. 5,605,889).

Art Unit: 1623

Each of The International Patent (page 5) and Curatolo et al (column 8, lines 20-45) discloses suspensions of azithromycin and polymeric suspending agent but do not disclose the specific amounts encompassed by the claims. However, since it would have been prima facie obvious to a person having ordinary skill in the art at the time the instant invention was made to vary the amounts of azithromycin and the polymer, the claimed compositions are deemed prima facie obvious over the art of record. Further, ta person having ordinary skill in the art at the time the instant invention was made would have been motivated to combine two known antibiotics into a single composition because such a person would have expected the resulting composition to be useful as an antibiotic.
